

TEC 450 Grease Gun

450 Grease Gun

High pressure lever action grease gun.

Ideal for mining, quarrying equipment, transport, heavy engineering, farm machinery and home workshop.

Suitable for both bulk or cartridge grease.

Rugged construction for optimum performance.

Operating pressure 50 MPa (7500 psi).

Made in Australia.

The Automotive Equipment Specialists

The TEC450

The high pressure Tec 450 lever action grease gun develops over 70 MPa (10,000 psi) greasing pressure for the most stubborn bearings. The 750g bulk grease capacity also suits 450g grease cartridges. Power recharge through head assembly grease nipple. Supplied with a sturdy rigid tube and hydraulic connector which incorporates 4 piece collet jaws and gives maximum grip without leaks. High pressure flexible hose and alternative connectors are available. A ground steel piston precision fitted to noncorrosive forged brass head assembly eliminates seals and replacement maintenance. High pressure heavy steel barrel resists damage.

Specification

Flexible delivery Hose & Hydraulic Connector	Barrel Capacity		Weight	Vol per Stroke	Operating Pressure
	Bulk	Cartridge			
V5715 HF4048	750g	450g	1.92kg	1.42cc	50MPa 7500 psi

Tubes and Connectors

A comprehensive range of connectors and extension tubes is available enabling any type of lubrication point to be serviced. It includes the straight rigid extension tube and the flexible versions shown right.

The following illustrations identify the various connections available for use with the TEC450.

*Tecazerk Connector
